

REMARKS

Reconsideration and allowance of the present application based on the following remarks are respectfully requested.

The prior art grounds of rejection are respectfully traversed. The claims are not amended at this time.

Fukui et al. discloses a technique for fabricating a wiring unit. It pertains generally to the technology to which our claimed inventions pertain. Gold et al. discloses a technique for packaging semiconductor chips and belongs to a technical field quite different from that to which our claimed inventions and those of Fukui et al. pertain. Thus, it would be inappropriate to combine the teachings of Gold et al. with those of Fukui et al. in attempting to solve the problems solved by our claimed inventions.

The Examiner states that an insulating frame 6 in Fukui et al. corresponds to our “inner electrical component.” Applicant believes that this analogy is not correct. Since the insulating frame 6 is made of an epoxy resin, it corresponds to a resin molded section in our claimed inventions. Thus, Fukui et al. does **not** disclose an inner electrical component. Thus, even if the teachings of Fukui et al and Gold et al were combined (which we don’t believe is appropriate), the result would **still** not be our claimed inventions.

In view of the foregoing, the claims are now believed to be in form for allowance, and such action is hereby solicited. If any point remains in issue which the Examiner feels may be best resolved through a personal or telephone interview, please contact the undersigned at the telephone number listed below.

All objections and rejections having been addressed, it is respectfully submitted that the present application is in a condition for allowance and a Notice to that effect is earnestly solicited.

Respectfully submitted,

Pillsbury Winthrop LLP
